C-Tech's 18ft Skiff components are manufactured from pre-preg carbon fibre. Products can be exported world-wide via airfreight or seafreight. Masts are supplied in 3 pieces, with the tip pre-fitted and ready to join on arrival. Carbon fibre spreaders can be supplied on bands, ready to be attached on arrival. By supplying the mast without spreaders attached the freight price is significantly reduced.

Prices are in NZ\$, ex factory, and exclusive of GST.
